

# Finishings

Colour for all tastes

100% Belgische  
design verlichting

**psmlighting**  
Delighted to help you

Psmlighting offers you a big range of different colours. In this folder you will definitely find a colour that matches your interior. In our own paintshop, we paint the products carefully and with high quality powder coatings. The big advantage of our own paintshop is the shorter delivery time for our standard colours and products. We always work with high quality materials such as aluminium, inox or brass. RAL-colours are always on request.

**Please note: the colours in this folder can differ from the real colours.**

# OUTDOOR COLOURS

- / Standard colours
- / Special colours
- / Natural colours
- / Inox coating

Also for our outdoor products, we have a large range of different outdoor colours. Most of them are, just like our indoor colours, painted in our own paint shop.

The standard colours have a short delivery time, the other colours are available on request.

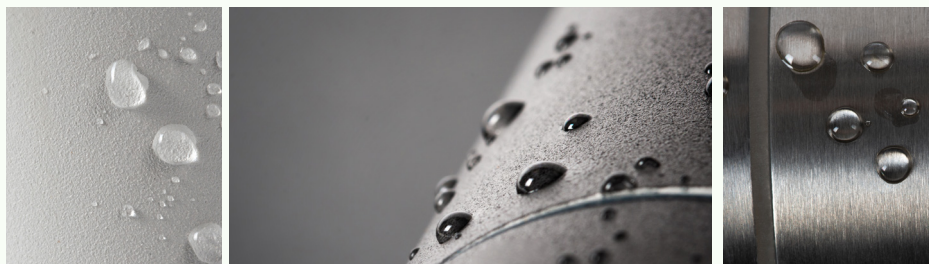

Please always mention which material you want:

- A = aluminium anodised
- X = inox
- AX = combination of alu and inox
- B = brass

Ex. 32X = black texture painted on inox housing

For fixtures who are going to be mounted in coastal regions, we recommend (double) coated inox, codes 5B or 5BB.

RAL-colours are always on request.
